PROFILE SUMMARY

I'm not a software engineer. I studied Economics at a government college in Toba Tek Singh because it was what I had access to, and something about it genuinely caught. During my first job as an office clerk, I noticed a broken process, went home that evening, and built a live multi-user web application to fix it. Nobody asked me to. It was just the obvious next step.

That tool (PrintDesk), is still live. I built a second one after that. Both solved real operational problems. Both were deployed in a government office environment without any IT support, CS degree, or formal training in software development.

My academic foundation is in econometrics, monetary economics, and development policy. I'm drawn to work that evolves, roles where analytical thinking, independent initiative, and showing up with a better solution are treated as assets.

WORK I'VE BUILT

PrintDesk | *print-desk-mu.vercel.app*

A live multi-user web application built to replace a paper notebook that was causing billing arguments in a government office. Features: personalized dashboards, real-time balance tracking, billing generation, stock management, and monthly archive system. 8 active users. Zero billing disputes after launch. Built after working hours, with no CS degree, using no-code tools deployed on GitHub and Vercel.

Policy Record | *testingapps78.github.io/Policy-App*

A data entry web tool that eliminated hours of repetitive manual work from insurance policy management. Smart auto-fill defaults, search by policy number, year and month filters, and print-ready formatted outputs. Built after observing the inefficiency of manual register-based record keeping and replicating the workflow digitally.

EDUCATION

BS Economics | *GCUF Affiliated Govt. Graduate College, Toba Tek Singh*

Nov 2022 – Jun 2026 | CGPA: 3.13 / 4.0

HEC-recognised · Affiliated with Govt. College University Faisalabad Coursework: Money & Banking · Monetary Economics · Islamic Economics · Econometrics · Macroeconomics · Development Economics

- Class Representative (CR): Primary liaison between Economics faculty and 40+ students for two consecutive years; coordinated academic schedules, exam arrangements, and official communications

FSc Pre-Engineering | *Govt. Graduate College, Toba Tek Singh*

Oct 2019 – Dec 2021

Board of Intermediate & Secondary Education (BISE), Faisalabad

Matriculation — Computer Science | *Govt. Islamia Secondary School, Toba Tek Singh*

Sep 2017 – Oct 2019

Board of Intermediate & Secondary Education (BISE), Faisalabad

FINAL YEAR RESEARCH

Thesis: *"The Nexus of R&D, Absorptive Capacity, and Innovation: Evidence from Pakistani Enterprises"*

Supervisor: Dr. Muhammad Zeeshan Younas · Lecturer, Applied Economics & Research Methods · GCUF Affiliated Govt. Graduate College

PROFESSIONAL EXPERIENCE

Office Clerk | *State Life Insurance Corporation of Pakistan · Toba Tek Singh Area Office*

May 2026 – Jul 2026

- Built and deployed two internal web productivity tools (PrintDesk) and (Policy Record) on personal initiative, solving real operational problems without being asked

- Managed end-to-end documentation workflow: receiving, verifying, filing, and processing insurance policy records in a formal government environment
- Digitized and maintained policy records in Excel; composed structured staff data reports for area management
- Drafted official correspondence and internal communications; ensured all paperwork was audit-ready at all times
- Uploaded and tracked completed cases on the organisational portal following thorough documentation review

Online Communication Manager — Vehicle Shipments | *Remote Client · California, USA*
Nov 2023 – Mar 2024

- Coordinated logistics data for international client accounts, processing 20+ vehicle shipments weekly with zero errors
- Served as primary point of contact across time zones; maintained audit-ready digital logs of all client interactions

Online Product Listing Expert | *Macropick.com · Remote, California, USA*
Dec 2023 – May 2024

- Published 50+ verified product listings daily with accurate pricing and descriptions
- Conducted QA audits across 200+ live listings to maintain data accuracy and compliance standards

Online Bill Payment Specialist (Part-time) | *Local Business · Toba Tek Singh*
Jan 2023 – May 2025

- Managed digital financial transactions for local businesses with full confidentiality and zero errors
- Maintained error-free Excel ledgers for monthly reconciliation and audit trails
